Belgrade, July 10, 2012

Attn. Professor Takeshi NAKANO,
Center for Advanced Science and Innovation,
Osaka University bldg. D 4F, CASI,
Osaka University, 2-1, Suita, Osaka 565-0871, Japan

Dear Professor NAKANO,

With this letter I would like to officially invite you in front of Serbian Chemical Society and Faculty of Chemistry to visit University of Belgrade in order to present your research in the field of persistent organic pollutants (POPs) and perfluorinated compounds (PFCs). As you are a world known expert in this field, I strongly believe that your presentation will enhance our understanding of how important is POPs analysis and monitoring in the environment. Also discussion about your experience from Japan and Asia in whole, regarding these contaminants will be more than welcome in the light of global environmental pollution.

Vladimir P. BEŠKOSKI, D.Sc.Biochem.,
Assistant Professor
Faculty of Chemistry
University of Belgrade
